

STRATEGIC- PLAN

1. Centre of excellence for Dental Education

- The existing curriculum has well defined outcomes but no definite competency, so we aim to set the standards and give the students a helping hand to excel in their dental education elsewhere in the world by setting the following goals:
 - Sharing and updating the students about the newer trends and concepts in dentistry by conducting meaningful workshops and CDE (Continuing Dental education) programs.
 - Identifying the reticent students and providing them with enough opportunities to sustain in this competitive world by providing value added skills such as Communication skills & Empathy skills through the faculty and student psychologist.
 - Engaging the I & II BDS students to apply the basic applied sciences into the clinical scenario thereby improving their confidence in handling the clinical cases.
 - Providing an opportunity (conducting frequent competitive tests and analysing the results with the expert faculty) to interns for PG NEET exam preparation and guiding (conducting general skill and aptitude tests, workshops on the scope of dentistry) interested students for both abroad opportunities and competitive exams.
 - Sorting support in terms of student learning experience from distinguished alumni students of KLRs LIDS in making the institution a centre of excellence.

2. Quality assurance Teaching and Learning Process

There are subtle differences observed in the existing teaching methodologies, a goal will be set to:

- Streamline the process of uniform conduction of class room teaching activities with no discrepancy in the small group sessions conducted in a day by monitoring committee (Academics)

- Monitoring the staff to deliver the uniform topic content in the class under the supervision of respective Heads of the department and monitoring committee, also addressing the faculty to follow the given topic schedule for effective learning

3. Student Attendance

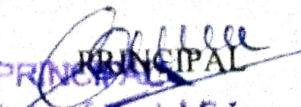

The existing referral batch students have shortage of attendance despite sensitizing them on the same by their mentors, so a goal will be set to identify the underlying problem and giving remedial measures through the support of student psychologist and thereby overcoming the hurdle.

4. Goals

- To be among the top 10 Dental College in India and a global institute 2025.
- To provide high quality oral healthcare to rural areas around the district by the means of world class equipment and infrastructure by 2025
- To collaborate with industries and research laboratories for teaching and research excellence.
- To develop environment for innovation leading to publications, patents, trademarks and copyrights as well as cost -effective treatments.
- To contribute in diagnosis and treatment of emerging dental diseases and treatment needs of patients in central India.

5. Skill development, Employability and placements

- To motivate passing out students to compete in NEET PG to pursue for Masters and Doctoral degrees in leading Universities within and outside India.
- To provide in house skill development opportunity for all students.
